The Balfour Declaration Was a Banking Deal

In 1917, Britain wrote a 67-word letter that promised a land it didn't own, to a people who didn't live there, over the heads of those who did. That letter — the Balfour Declaration — was addressed to Lord Walter Rothschild, head of the most powerful banking dynasty in the world. But why a banker?

By 1917, Britain was financially collapsing. Its national debt had exploded from £650 million to nearly £7.5 billion. Its overdraft at J.P. Morgan had hit $400 million. Woodrow Wilson was threatening to cut off American credit entirely. Britain came within weeks of being unable to pay for the war.

So Britain did what desperate empires do — it made deals. It promised Palestine to the Arabs in exchange for the Arab Revolt. It secretly agreed with France to carve up the Ottoman Empire. And then it promised the same land to the Zionist movement, in a letter addressed personally to the man whose family had been financing both the British Empire and Jewish settlement in Palestine for decades.

This video traces the financial crisis behind the Balfour Declaration, the Rothschild family's role in purchasing the Suez Canal and funding early colonies in Palestine, the chemistry of explosives that gave Chaim Weizmann access to the highest levels of British power, and the three contradictory promises that created a century of conflict.

From J.P. Morgan's war loans to the collapse of the British Treasury to the imperial strategy behind the Mandate — this is the full story of how banking, desperation, and imperial ambition converged to reshape the Middle East forever.

Sources include the Rothschild Archive, IMF historical debt records, the 1914-1918 Online Encyclopedia, CEPR economic research, Britannica, Hansard parliamentary records, and primary Cabinet documents.

Sadly, the forever wars the West is waging is to collect collateral for their dying financial system. This video gives a good background why these things are happening.

This particular piece should be made required reading or listening to, for the type of eye-opening mass edification and education that is required to expose the deceitfulness of so called world leaders and their banker friends.

So WWI was pivotal in recent history, it led to WWII, the sellout of Palestine and the creation of the Saudi control of Arabia. And big money was to blame.
